

Export the Analytics

Date	8 November 2022
Team ID	PNT2022TMID51001
Project Name	Estimate The Crop Yield Using Data Analytics

The dashboard has to be shared in order for others to be viewed. In that case, click on the “Share” icon in the top of the dashboard.

The clicking of share icon would result in provoking of a popup window like the following

We are provided with three options namely, Send, Link and Export. In send, we can send through email.

If selected email option, the following would appear.

IBM Cognos Analytics with Watson

Estimate the Crop Yield using Data Analytics

Share with email

To: Search for name

Cc Bcc Directory

Subject: Dashboard "Estimate the Crop Yield using Data Analytics"

Message

Styles Format B I U

☒ Include link

☒ Include image

Cancel Send

In which the options provided are the to where we have to enter the address of the recipient, and the cc and bcc can also be added, and the subject for the mail, then the message which has to be displayed in the email, and sliders provided for enabling the include link and include image. By enabling the sliders for including link and including image, it would also be added in the mail.

After filling the information, it becomes like,

IBM Cognos Analytics with Watson

Estimate the Crop Yield using Data Analytics

Share with email

To: 953619104012@ritrjpm.ac.in

Cc Bcc Directory

Subject: Dashboard "Estimate the Crop Yield using Data Analytics"

Message: The dashboard created for estimating the crop yield with the provided data by means of data analytics

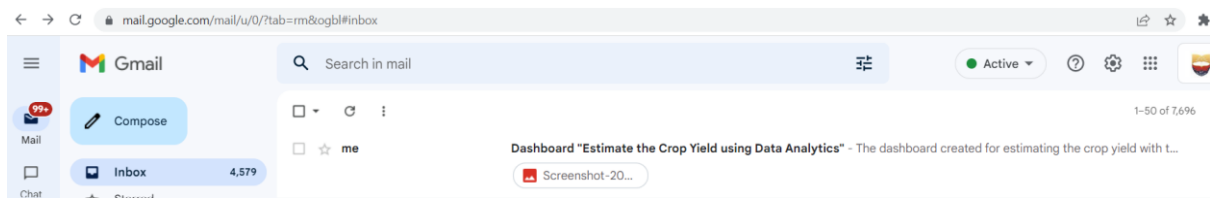

Styles Normal B I U

☒ Include link

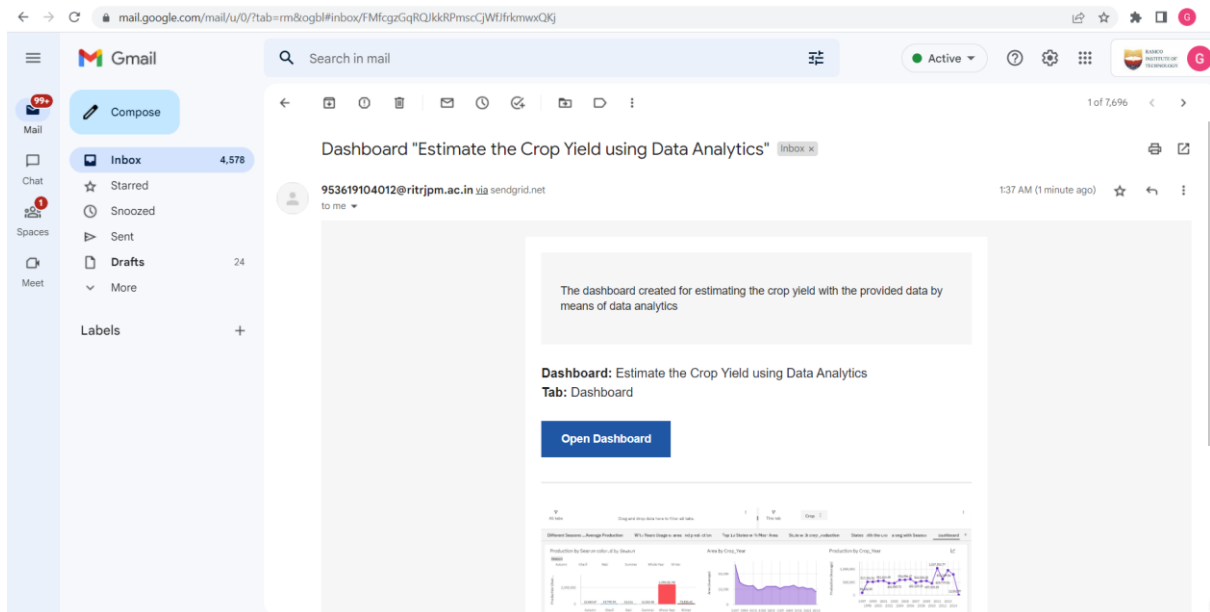

☒ Include image

Cancel Send

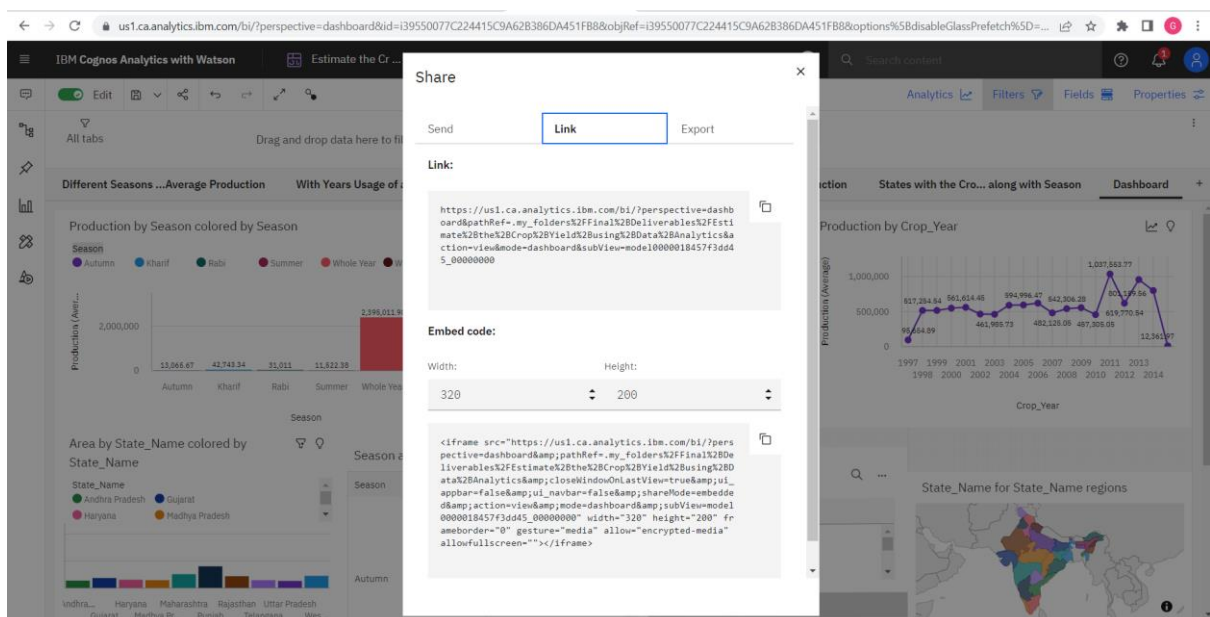

And on clicking the send button, the mail is sent to the recipient. In this case the recipient is me so, I got the mail

And the content of the email is

The second option for sharing is by means of "Link". A link is provided but it is mandatory for the recipient of the link to have an IBM account as only then they are allowed to view the content present in the link. And there is also a link provided for the purpose of embedding, we can embed it the website we create.

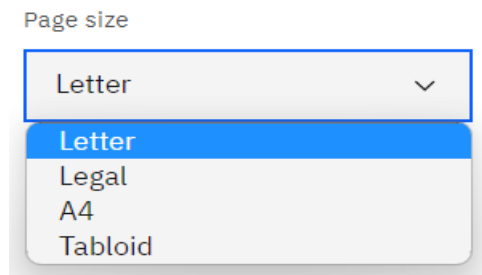

Link :

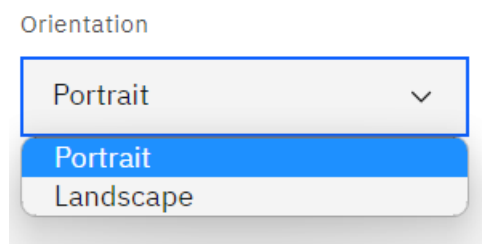

https://us1.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my_folders%2FFinal%2BDeiverables%2FEstimate%2Bthe%2BCrop%2BYield%2Busing%2BData%2BAnalytics&action=view&mode=dashboard&subView=model0000018457f3dd45_00000000

The third option is to “Export” where we have two options, which are page size and orientation.

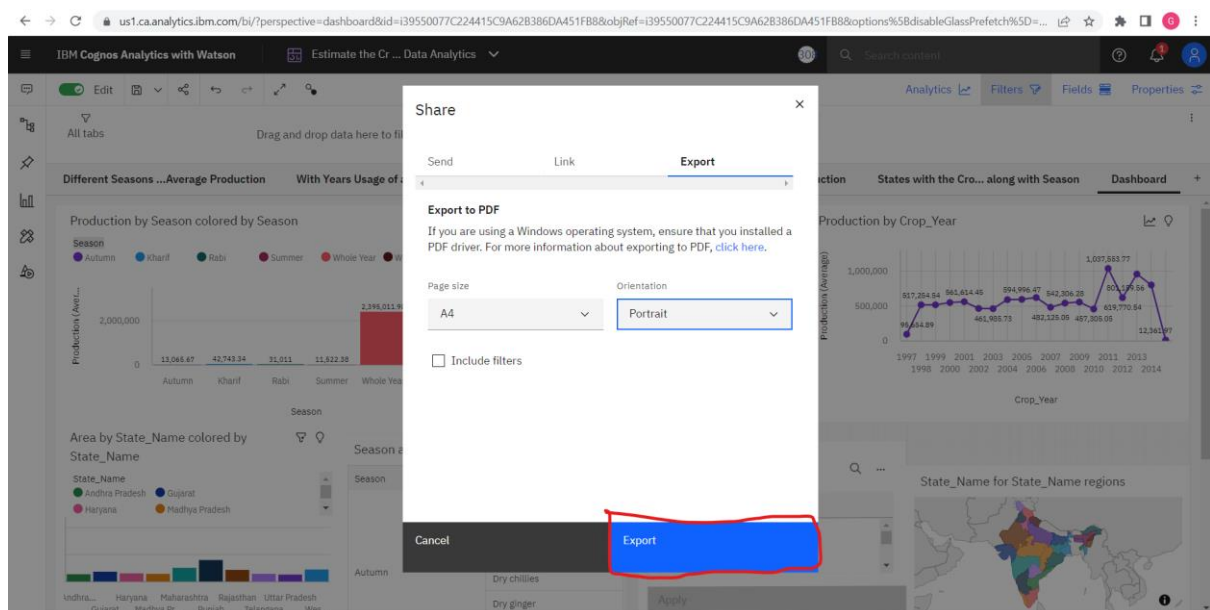

The page size corresponds to various options like

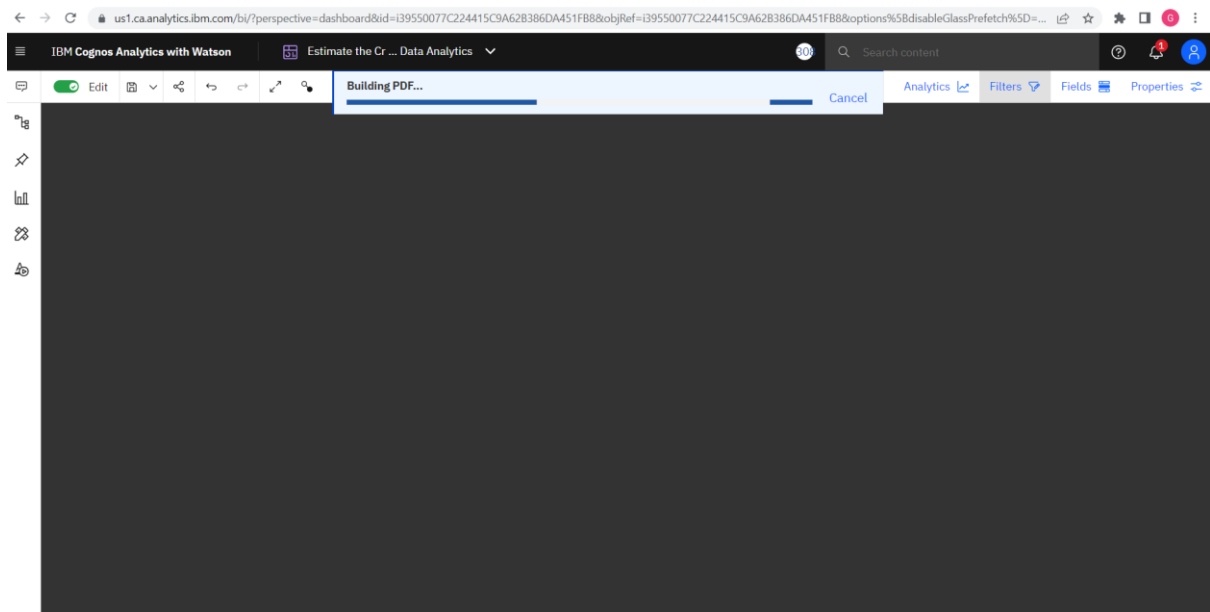

And the orientation has options as

In this case, for the purpose of exporting it into pdf, we are choosing the page size as A4 and the orientation as portrait and then we are supposed to click the Export button. And the exported pdf is being also submitted in Sprint-2.

The pdf which is built is also submitted along with other files and placed in Sprint-2 folder.
