EXPORT THE ANALYTICS

Date	09 November 2022
Team ID	PNT2022TMID51001
Project Name	Estimate The Crop Yield Using Data Analytics

In order for others to view the dashboard, it must be shared. In that case, go to the dashboard's top and click on the "Share" icon.

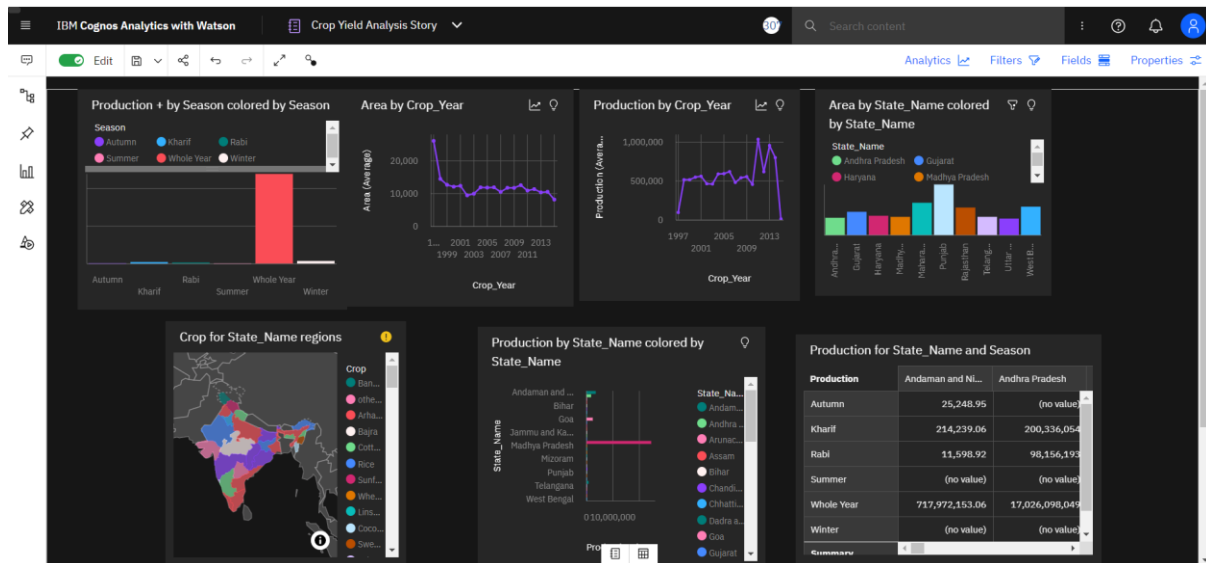

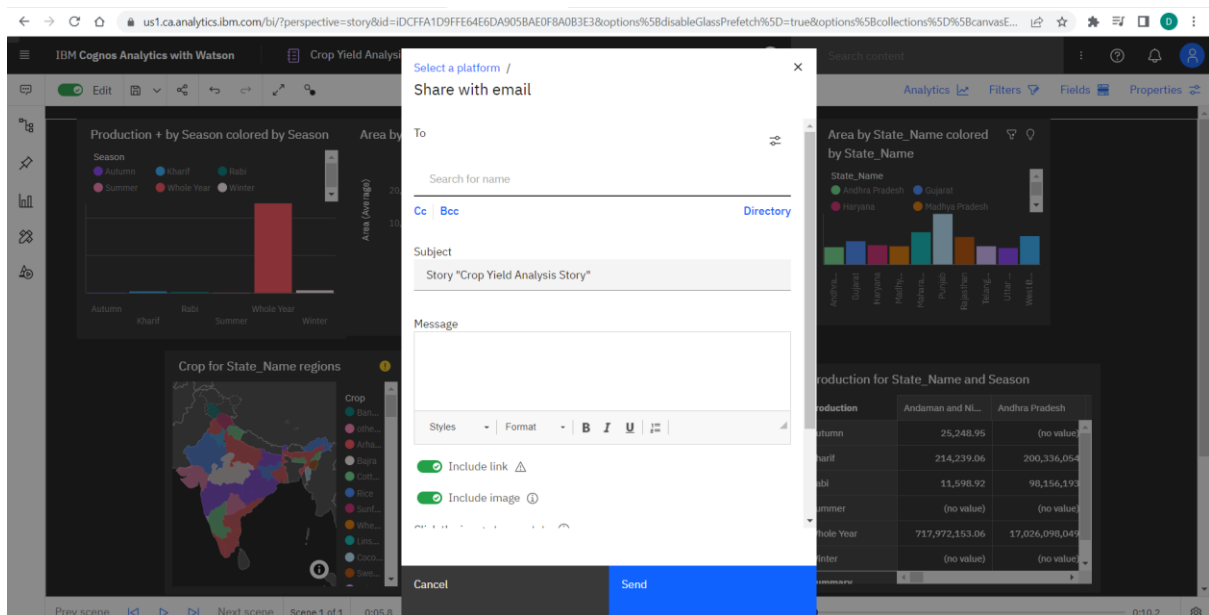

When you click the share icon, you'll get a popup window that looks like this.
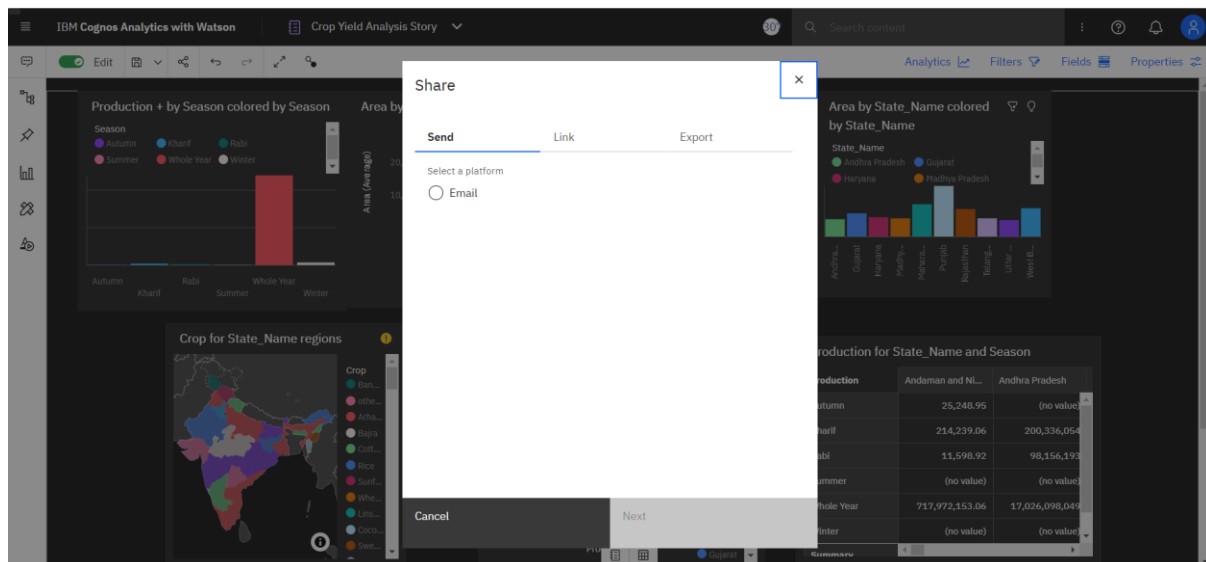

There are three options available Send, Link, and Export. We can send via email in send.

If you choose the email option, the following would appear:

In which the options provided are the to where we must enter the recipient's address, as well as the cc and bcc, and the subject for the mail, then the message which must be displayed in the email, and sliders for enabling the include link and include image. By enabling the sliders for including a link and including an image, it will be included in the email as well.
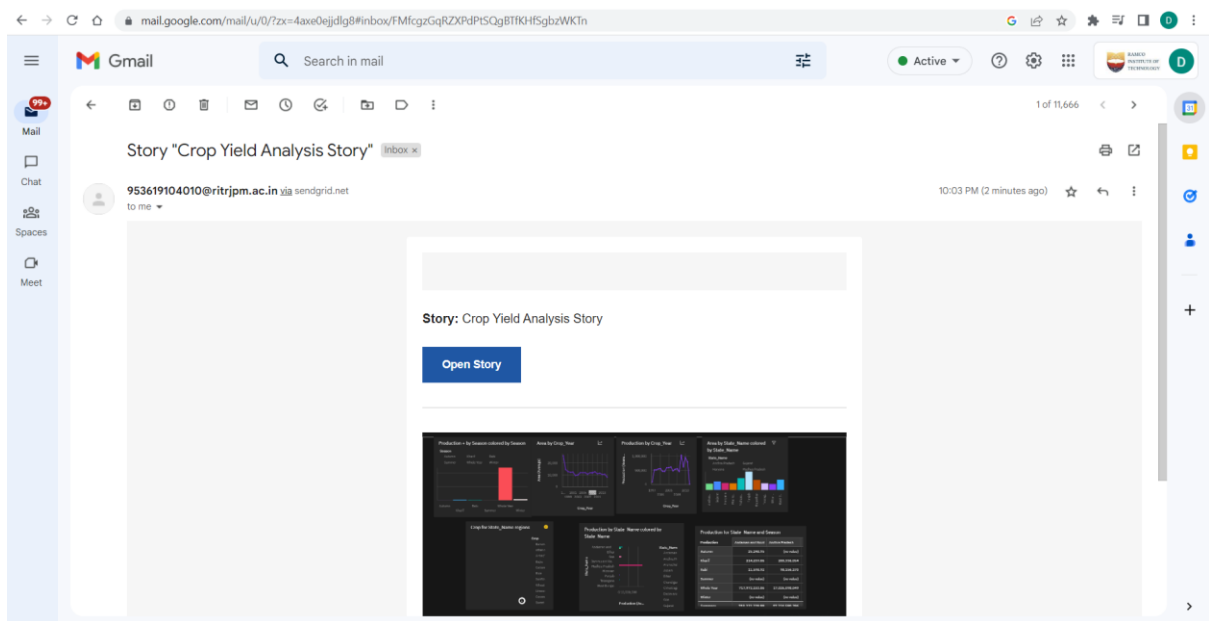

It looks like this after you fill out the information.
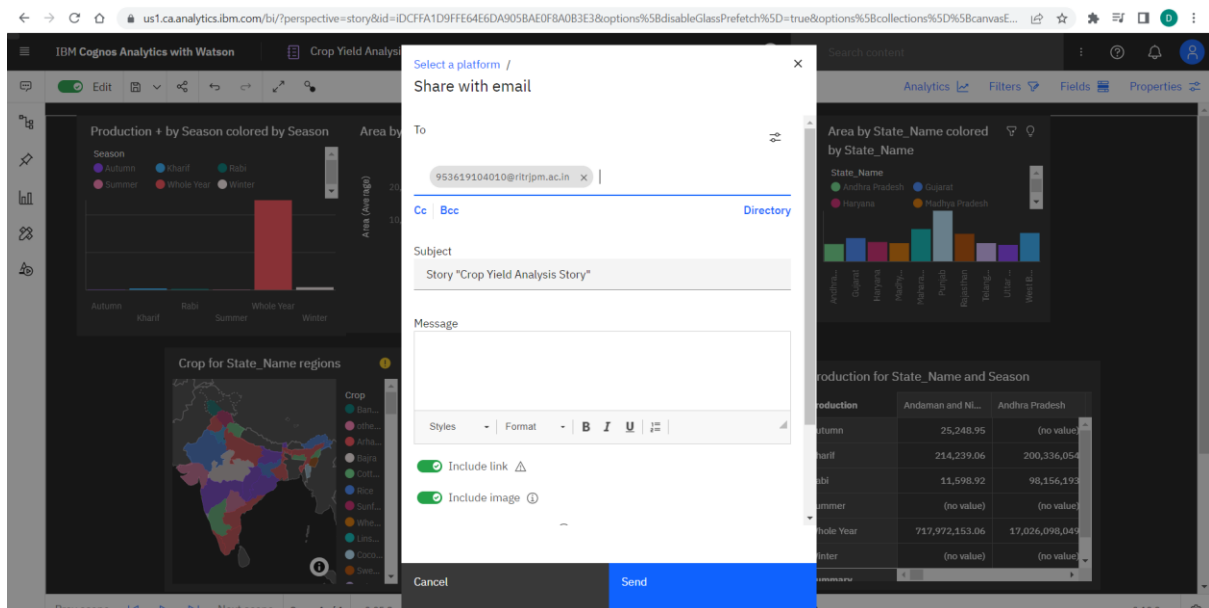

By clicking the send button, the mail is sent to the recipient. In this case the recipient is me so, I got the mail
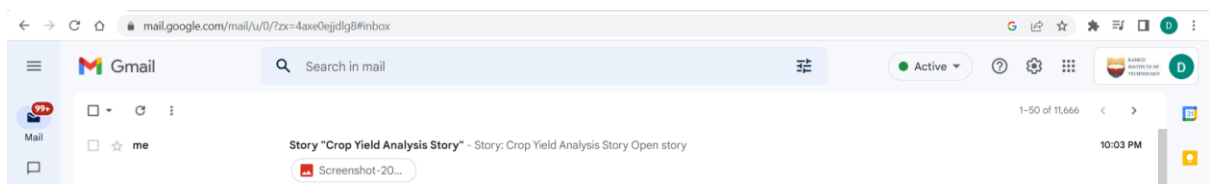

The content of the mail will appear like below

The second method of sharing is via "Link." A link is provided, but the recipient must have an IBM account in order to view the content contained in the link. There is also a link provided for embedding, we can embed it in the website we create.

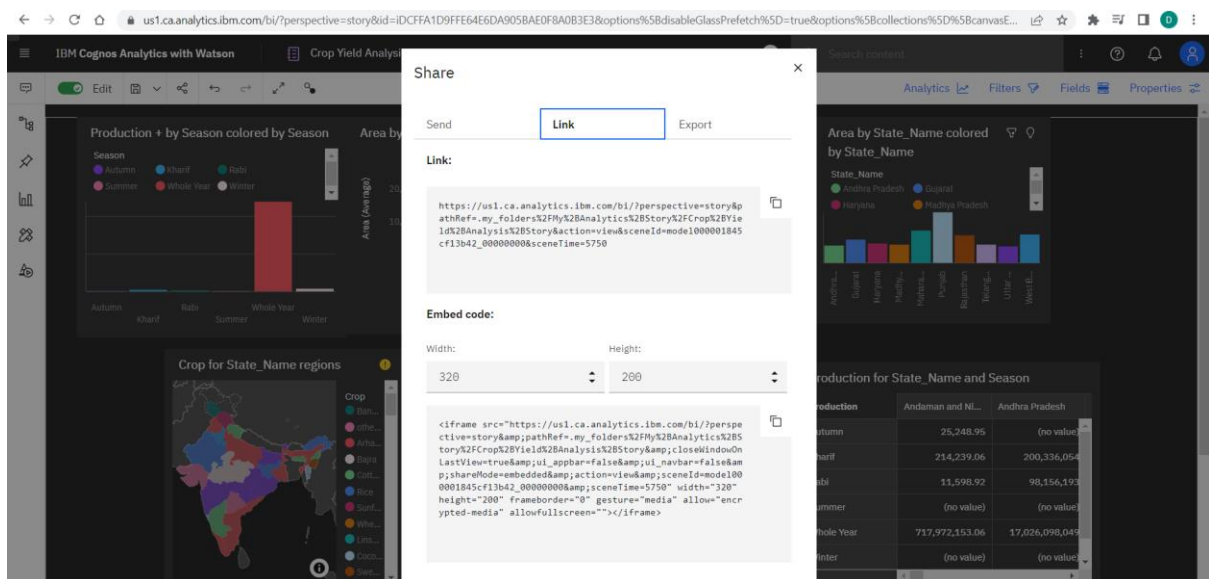

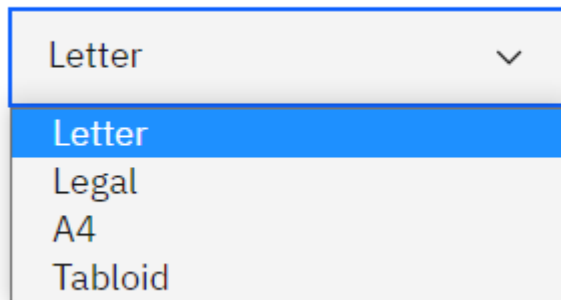

LINK:

https://us1.ca.analytics.ibm.com/bi/?perspective=story&pathRef=.my_folders%2FMy%2BAnalytics%2BStory%2FCrop%2BYield%2BAnalysis%2BStory&action=view&sceneId=model000001845cf13b42_00000000&sceneTime=5750
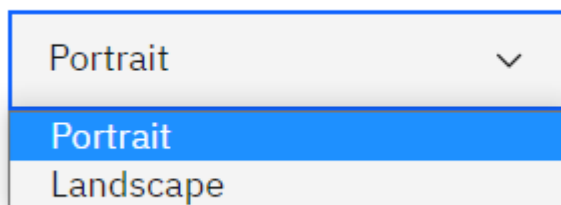

The third option is to "Export," which gives us two options: page size and orientation. The page size corresponds to a variety of options such as

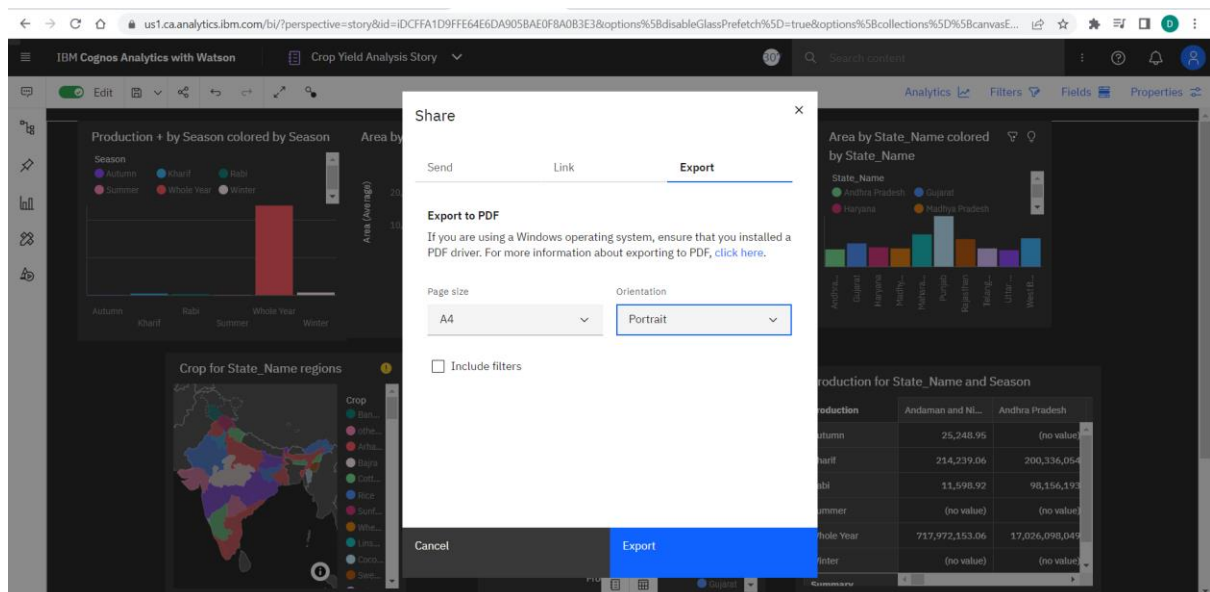

Orientation has options like

In this case, for the purpose of exporting it into pdf, we select A4 as the page size and portrait as the orientation, and then click the Export button.

Finally, the pdf is created
